Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Sherrod (6,053,380). Sherrod discloses an automatic gloving apparatus that conveys a glove from a storage portion containing a plurality of gloves to a hand insertion portion. The glove holding applicator assembly opens the mouth of a glove being donned and intermittently blows air into the open glove. With respect to Claim 8, the automatic gloving apparatus disclosed by Sherrod conveys a glove from a storage portion containing a plurality of gloves to a hand insertion portion. The glove holding applicator serves as a movable claw member opening the mouth of a glove being donned and having an air blow port thereon for intermittently blowing air into the open glove.

Allowable Subject Matter

3. Claims 2-7, 9, and 10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. The following is a statement of reasons for the indication of allowable subject matter: Independent Claim 2 if rewritten in independent form including all of the limitations of the base claim and any intervening claims because of the limitation that the air blow means intermittently

Art Unit: 3765

blow air into the glove on a cycle between 3Hz and 6Hz. Claims 9 and 10 further require a fixed claw member associated with the moveable claw member for holding and opening the glove.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US Patent 4,889,266 represents the most relevant prior art pertinent to the Instant Invention.
